PROJECTS:

StarWars App:

A single page application (SPA) showing all characters of the Star Wars Movie. Built with Vanilla JavaScript, HTML5 and CSS3.

Technologies Used – HTML5, CSS3, JavaScript

Category - Personal Project

Link: <https://alexander-ekeh.netlify.app/>

Bank Transaction App V1:

This application handles the transfer of funds between two account holders: the sender and receiver account.

Technologies Used – Node.js, Express.js, Typescript.

Category - Personal Project

Link: <https://alexbankapp-v1.herokuapp.com/>

Job Search Application:

This is a Decagon Group project handled by a team of 4 highly skilled and motivated individuals which I am privileged to be part of.

The application enables Job seekers to search for available jobs when they visit the application. It's a simulation of a real website if hosted on a paid platform.

Category - Group Project

Technologies Used – HTML5, CSS3, JavaScript, Reactjs.

Link: <https://github.com/AlexEkeh/Job-Search-Application>

IT Services Application (On-going)

This is a Decagon Live group project currently being built by a team of 13 highly-skilled and experience developers which am privileged to be part of. This is a web-based application that gives clients a plethora of options when seeking for a particular IT product and service.

Category - Group Project

Technologies Used – HTML5, CSS3, JavaScript, React, MongoDB, Typescript, And Express Framework.

EDUCATION

Nnamdi Azikiwe University — B.sc
